

It's like having a guard in each guestroom

One eye on the future – the other on the past

We may not be able to predict the future, but with the Sentinel Advanced in-room electronic safe, it's easy to see what's in the past. Utilizing the most advanced audit trail system on the market, the hand-held SafeLink unit is capable of printing out the last 100 safe events, including who opened the safe and when. The ability to provide such valuable information on demand, and in the presence of the guest can help protect the hard-earned reputation of your property and staff, as well as reducing false liability claims. The SafeLink unit also provides a user-friendly service management tool with sophisticated password

protection that has set a new standard in the industry. In addition, the Sentinel Advanced model offers all the innovative security features included in the Sentinel series, such as a revolutionary locking mechanism, anti-tamper labyrinths, and extended solid-steel hinges. Its unique modular construction and reprogrammable software allow you to plan for the future, as well. You can even upgrade to new technologies such as Biometric access. The Sentinel Advanced is part of a proud heritage of Elsafe electronic safes, the reliable world leader in hotel safe technology for over 20 years. Now that's a past that guarantees your future satisfaction.

SENTINEL

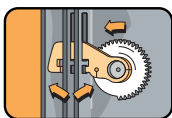

Advanced

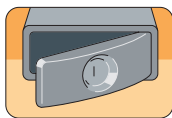

FEATURES

- Simple 4-digit PIN code operation
- Highly visible LED display
- Audit trail capability with hand-held SafeLink unit
- Revolutionary locking system with inter-locking deadbolt mechanism
- One piece, cold-pressed curved door is over 70% stronger than flat steel door
- Extended solid steel bolt hinges for maximum security and durability
- Solid, arc-welded heavy-gauge steel construction and recessed back for superior strength and security
- Anti-tamper, auto relock function
- Three convenient standard sizes available
- Attractive, ergonomic design
- Unique modular construction for easy upgradability

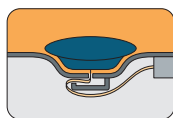

TECHNICAL INFORMATION

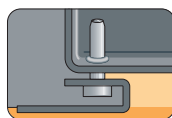

ELSAFE'S REVOLUTIONARY LOCKING SYSTEM RESISTS FORCIBLE ENTRY.

ONE-PIECE COLD-PRESSED DOOR IS OVER 70% STRONGER THAN FLAT STEEL DOOR.

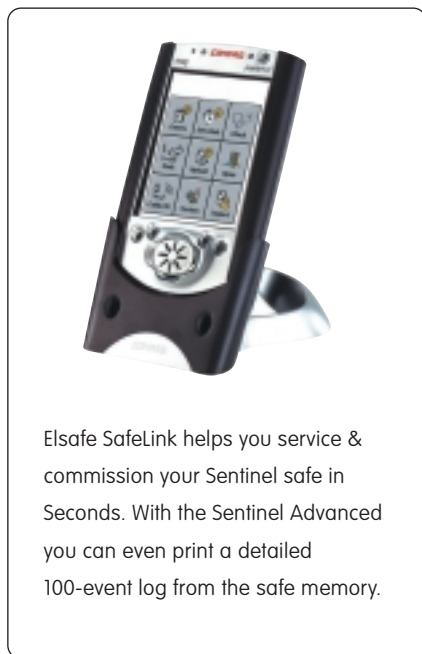

ANTI-TAMPER LABYRINTHS PROTECT SENTINEL ELECTRONICS FROM MANIPULATION.

EXTENDED SOLID STEEL BOLT HINGES ARE SECURE AND ULTRA-RELIABLE.

With the state of the art security features offered in the Sentinel Series of in-room safes, there is simply no better way to protect the property of your guests at such an affordable price. Based upon the Elsafe industry-leading Infinity Collection that has been widely applauded since being introduced, the Sentinel Series is setting new standards for strength and security, while offering an economical solution that won't break your budget.

Elsafe Safelink helps you service & commission your Sentinel safe in Seconds. With the Sentinel Advanced you can even print a detailed 100-event log from the safe memory.
