

Solve your housekeeping problems

Optimize cleaning schedules dynamically for lowest cost. Manage quality of cleaning effectively. Target training and improve communication.

Improved Quality

- Accurately schedule preventive and periodical cleaning tasks.
- Schedule inspections regularly and measure using a quality scale – resulting in tangible KPIs for all attendants.
- Provide room attendants sufficient time to clean each room properly – without rushing.

Reduced Payroll

- Save up to 15% on attendant payroll via continuous monitoring and enable accurate forecasting of resource requirements.
- Create intelligent and optimized, real-time daily cleaning plans based on occupant profiles & reservation data* throughout the day.
- Dynamically adjust cleaning plans and cleaning schedules throughout the day.

*Patent pending

Satisfied Customers

- Enhance the guest experience through better quality and consistency of rooms.
- Accelerate clean room inventory availability via an optimized and continuously managed cleaning schedule.
- Manage early arrivals confidently thanks to more timely information on room availability.

Better Training

- Pinpoint required training areas for individuals or the whole team.
- Identify individual strengths/weaknesses as part of an ongoing performance coaching strategy.
- Provide descriptive instructions and photos on the handheld device for use as a training tool and reference for all room attendants.

The first true innovation in housekeeping since the telephone

Time to step up from the spreadsheet

Communicate instantly via handheld device

Instant Notifications

Advise Executive Housekeeper of DNDs, skips and sleepers. Automatically receive updated schedules.

Communication

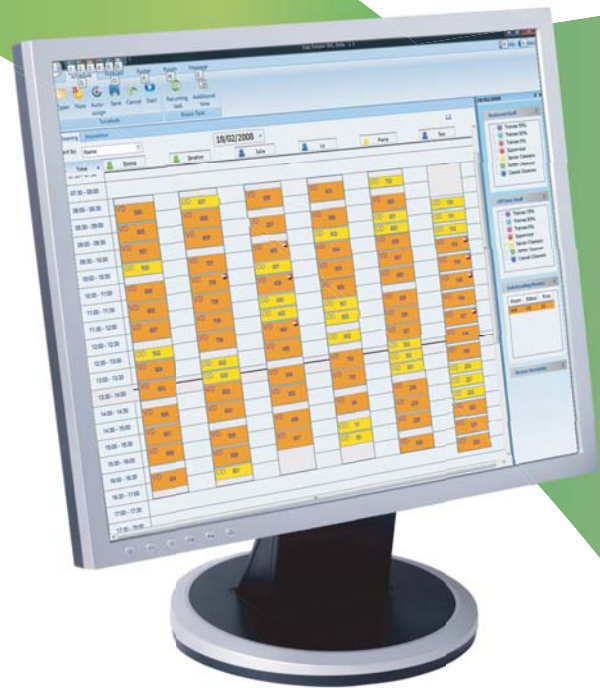

Send and receive timely communications and alerts.

Inspections

Report detailed scores of room cleans and instantly alert management of outstanding issues.

Easy To Use

Operate handheld device via a simple, touch-screen interface. Designed specifically for non-computer users.

Manage effectively

Reporting

Access detailed management reports on quality and efficiency for group- and hotel-wide comparisons.

House Status Monitoring

Communicate and action room changes and early departures as they occur. No need for phone calls between Front Office and Housekeeping.

Roster Monitoring

Continually assess future labor requirements against business on the books. Excessive or insufficient labour hours are advised.

Employee Satisfaction

Assign cleaning times for each room through intelligent load balancing, maintaining quality and preventing rush jobs.

Capex Planning

View and report conditions of furniture and fittings in real-time – enhancing capital expenditure planning processes.

Laundry Tracking

Accurately record linen in and out on a daily basis.
